EXPERIENCE

Junior ETL Developer

Leverage Lab, LLC | July 2020 - Present

- Build and automate data connections that load data into BigQuery using cloud functions and ETL tools.

- Transform and join data in BigQuery to produce views that provide clients with insight into their audience and campaign performance.

- Design and configure real-time visualizations in Google Data Studio utilizing data from BigQuery.

Registrar

Insight School of Kansas | 2019-2020

Math Teacher & Coach

Blue Valley School District | 2017 - 2019
Independence School District | 2016 - 2017

Owner, Personal Organizer

Simple Space, LLC | 2018 - 2020

SELECTED PROJECTS

Records

github.com/brooklynrauckman/Records

- Built an iOS app using React Native that allows users to manage their vinyl record collections.

- Implemented Firebase to manage authentication, upload images, and store user data.

- Used Redux to manage global UI state.

Sustainable Swaps

confident-euler-0c7809.netlify.com

- Built a web app using React that allows users to search and filter a list of sustainable alternatives to everyday items.

- Incorporated the ability to calculate a user's potential yearly savings and share their list with friends.

- Set up continuous deployment with Github and Netlify
