PROJECTS:

SUSTAINABLE SWAPS

confident-euler-0c7809.netlify.com

- Built a web app using React that allows users to search and filter a list of sustainable alternatives to everyday items.
- Incorporated the ability to calculate a user's potential yearly savings and share their list with friends.
- Set up continuous deployment with Github and Netlify.

I WONDER

competent-rosalind-8f9dcf.netlify.com

- Designed and built a frontend web app using React that allows users to compare space objects.
- Built a backend with basic CRUD functionality using Node and PostgreSQL.
- Deployed using Netlify for the frontend and Heroku for the backend.

CHALLENGE BY CHOICE

reverent-mcclintock-1d3ef5.netlify.com

- Designed and built a web app with React and Firebase that allows users to keep track of their goals.
- Implemented Firebase authentication and CRUD functionality.
- Set up continuous deployment with Github and Netlify.
